Press Release

Healthcare Construction Certification Obtained by Colonial Electric

Harwood, Maryland – February 5, 2010. Travis Katski, President and CEO of Colonial Electric Co., Inc. and Roger Staiger, Service Division President, recently completed The Healthcare Construction Certificate (HCC) program of the American Society for Healthcare Engineering. This pre-requisite e-learning program and two-day seminar educates attendees on critical topics relating to healthcare construction and provides contractors with the information needed to work effectively and efficiently in the healthcare environment. Many hospitals and healthcare centers are requiring this infectious disease certification in order for contractors to work in these establishments. Colonial now has this certification in house and can meet the needs of general contractors in need of this type of certification. “If we want to be the best, we have to continue to learn and find ways to add value for our customers,” said Mr. Katski. “Our completion of this program will help us be a better partner to our customers on healthcare projects.”
